

BATHROOM RADIATORS.

heating through innovation.

The **Dion** series has the design of a classic, elegant radiator with round pipes. The bathroom radiator has an eye-catching, elegant design and brings comfort into your bathroom.

Advantage:

The discreet horizontal heating pipes are ideal for hanging and drying hand towels and bath towels.

PRODUCT DESCRIPTION & SCOPE OF DELIVERY.

VOGEL&NOOT bathroom radiators are high-quality branded products that invite you to be creative in designing your bathroom, thanks to their elegant design. There are three designs to choose from: the bathroom radiator with the classic connection, the bathroom radiator CV with central valve connection and the purely electrical design.

Scope of delivery

The **bathroom radiator** is an elegant designer radiator with round pipes and consists of the following accessories: a vent plug, a dummy plug, a wall fastening set, an installation aid and an installation instruction sheet. These accessories are enclosed free of charge.

The **bathroom radiator CV** is an elegant designer radiator with round pipes and consists of the following accessories: a vent plug, three dummy plugs, a double-pipe angle-shaped valve connection fitting, a wall fastening set, an installation aid and an installation instruction sheet. These accessories are enclosed free of charge.

Design with classic connection

The **bathroom radiator** is supplied with 4x1/2" IG connections.

Design with central valve connection

The **bathroom radiator CV** is supplied with 4x1/2" IG and 2x3/4" AG connections.

Purely electrical design

Straight model

Additional equipment

In addition, an E-heating element can also be ordered. All of the bathroom radiators that are fitted with an E-heating element can also be used at times when heating is not required. Of course, it is also possible to fit all of the accessories retrospectively, with a few simple steps.

Operating conditions

The test pressure is 13 bar, the maximum operating pressure is 10 bar and the maximum operating temperature is 110°C.

Surface treatment

High-quality, environmentally-friendly two-layer paintwork in accordance with DIN 55900, anodic dip priming with electrophoretic coating using water-soluble paint; electrostatic powder coating.

Branded products of certified quality

VOGEL&NOOT offers reliable products that meet the highest quality standards during manufacture and operation. All of the quality and performance specifications of the panel radiators offered by **VOGEL&NOOT** are continuously tested and confirmed by recognised European institutes. They guarantee safety in connection with the highest heating performance and optimum product quality.
