## Abdeckroste

### Trägerabsätze der Längsabdeckroste

Gegen Durchbiegung des Längsrostes müssen als Unterstützungen die beigegepackten Trägerabsätze benutzt werden. Die Trägerabsätze werden im Abstand von ca. 30 cm verlegt. Starre Roste können aus Konstruktionsgründen nicht bei Intratherm mit der BH 75 mm und 90 mm verwendet werden. Sie sind für den Transport und für die Montage durch ein Plastikband fixiert, das nach der Endmontage entfernt werden kann.
